LRPC strands

Features

- Low Relaxation Pre-Stressed Concrete Steel Strands which are used in pre-stressing of concrete for different kind of construction works
- Better build which in turn assures the safety and longevity

Uses

- To prestress the concrete in different types of construction works

Induction Tempered Wire

Features

- Spring wire is a type of wire which is known for its property of offering high wear resistance

Uses

- Suspension springs for metro trains, shock absorbers of vehicles and even in the emergency brakes of large vehicle

Features

- Heat Resistant + Smooth Surface

Uses

- To make railway sleepers
- To make PCC Poles

Steel Wire

Plastic Films - Wide Product Portfolio

Geomembrane Sheet

Features

- Stellar surface finish
- Available in single textured surface
- Supreme shear strength
- Strong hold from tear or abrasion

Features

- Has high demand in Agri sector, also provides superior germination and faster plant growth
- Excellent durability
- High resilience
- Maintains soil moisture

Pond Lining Films

Features

- Highly flexible in nature, being used as a shield from contamination of impurities.
- Available in different length and thickness.
- Weather resistance
- Resistant to puncture
- Enhanced durability

Features

- This film prevents from contamination of impurities, improves water availability over longer period
- Perfect finish
- Easy to tear by means of cutting tools
- Optimum flexibility

Greenhouse Films

Features

- Manufacturing of this sheet keeping in mind industry marked standard. Highly resistant to UV and water
- Available in various lengths and thickness.
- Withstands diverse weather conditions
- Highly stretchable

Proposed capital spending will grow by 35.4% year on year

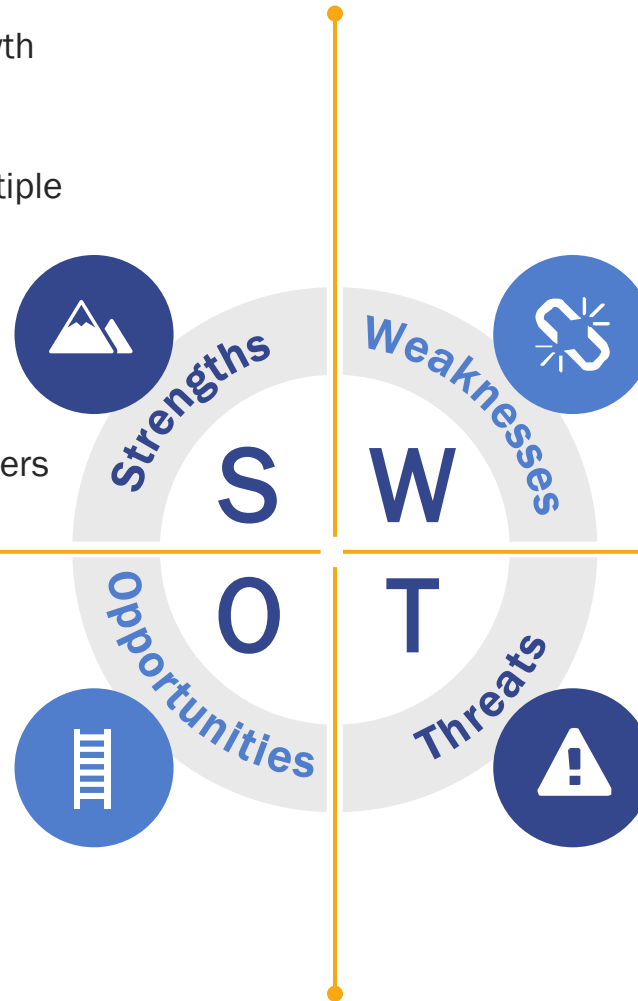

- The government's capital drive contributed in maintaining the capacity utilization rate for the steel sector at a forecast of 80% in FY2023, regardless of assigning of some new expansion projects
- Considering that the Central Government's capital expenses (capex) are anticipated to rise by 37% YoY in FY2024
- Rating Agencies has revamped upwards its steel consumption growth estimate for FY2024 to 7-8%
- The withdrawal of export duties, monthly finished steel exports have doubled to around 0.6 MT in Q4 FY23 from the November 2022 lows of 0.3 MT. While this pick-up is encouraging to see, the near-term growth opportunities in the overseas markets which looks more challenging
- As trade flows are shifted to fast-growing nations, imports of steel have increased during FY2023, that resulted in India becoming a net importer of finished steel for five months in a row between October 2022 and February 2023.
- Because of the local demand's sustained strength and the rising cost of inputs, domestic steel prices are anticipated to follow the global prices in direction and rise.

Strength, Weakness, Opportunities and Threat Analysis

- Strong and proven track record of delivering growth through innovation
- Resilient business model that has withstood multiple business cycles
- Diversified product portfolio catering to wide array of customers
- Long standing relationship with marquee customers

- India's burgeoning economy – growth for auto, real estate, white goods, transportation
- Thrust on Infrastructure – GOI spending increasing YoY to bolster country's infrastructure

- Competition from larger established peers
- Players from unorganised sector pose price challenges in the medium term

- Evolving regulations in the Industry – especially to combat pollution
- New age materials that could require extensive capital investment
